ABSTRACT:

This invention involves a hands-free wearable computer (1) that contains an expandable keyboard (4, 5, 6) and a display (2) integral with its housing. The wearable computer can be used, therefore, either as a hands-free wearable computer or as a small laptop computer with a normal size keyboard. The keyboard is integral with the top of the computer housing and can be folded away when the computer is voice activated, and folded out when the computer is used as a laptop.
